Título: A aposta intelligente - Comopredicting eleições pode render lucro e aumentar a participação em laughSinger election took place in Brazil on October 2nd, 2922. This year, the election was marked by the intensification of the use of big data and artificial intelligence (AI) in political campaigns. Several candidates relied on data analysis to reach their target audience and persuade undecided voters. The use of data scientists, machine learning algorithms, and social media management became the new standard of political marketing. Nevertheless, another novelty was noticed in this elections cycle: online betting. Online sports betting became legal in Brazil in 2024, and since then, numerous betting sites have been created or have expanded their operations in the country. The phenomenon was not limited to sports betting. Some of these sites began to offer political betting markets, allowing users to bet on the outcome of the elections. It was not something usual in Brazil, after all, politics has constantly been a controversial and polarizing theme.

The potential to offer profits to both sites and their customers drove the growth of the trend of online gambling and e-sports. In Brazil, many online betting sites charge high fees because they need assistance from nationally recognized monitoring services. Still, a legal channel can allow bookmakers to accept bets with good odds for favoritism and unfavorable odds for underdogs, effectively influencing who wins and earns big.

Some customers claim they achieved gains depending on their knowledge of probabilities and odds given the broad range of markets on the platforms. However, the risks of this business endeavor rise high, allowing possibilities of manipulation, as with blockchain. Online sports betting was restricted mainly because some nations still prohibit any kind of betting. Other than risky takers, more careful personalities avoid new untested sites. Platforms disappear without a trace together with customers' deposits.

Still, betting has persisted and continues more strongly than before, with new platforms steadily joining the ranks. With knowledge and research on probability-based games of chances rather

than prophecy and good luck, bet holders get real-time data stream news from all the sporting action happening at the moment with high-odds winning chances so vast that at times, bettors get enticed into money laundering schemes or big jackpots offering huge and enticing earnings. Hence, don't go that path and get your information on sports news sites and our leading experts instead of the best online websites that will bring you the greatest tools to predict circumstances. Daily observation and current news, to be ahead in certain markets. Although, be informed: being very addictive, as casinos can also be your financial end. Some players and fans have become interested, especially during the pandemic, as it is free and profitable for non-sports lovers who quickly ventured into it to boost their revenue due to high levels of unemployment and money loss during pandemic lockdowns and closures, many getting looted while others struggled financially to put food on the table and needed answers to regular inflow. Lossing in bets was a harsh beginning to their education; lack of accountability for these markets will push those interested to learn the tools and dive into reality with full knowledge or eventually enter with a honeymoon period rush of a large knowledge pool for markets ranging from Politics to esports (premier leagues for cs: go, Nba2k, LoL, etc) and varied sports like soccer, tennis, rugby, MMA, etc. Political markets rely on international election news, polls, social climates (protest rallies, environmental movements and the sorts), current party formation, the popularity of a contestant, etc. Individuals with other sorts need a special energy to dive.

Since the prediction revolves around the winner of a higher chance of winning using search and calculated prediction based on prior results and a clear notion of who might triumph after weighing critical variables such as the favorite and local favorite in location-sensitive markets (France winning in France), this strategy appears trustworthy until events change course drastically with very little to no former notice, or at least time to find reliable, solid intel to back arguments that would change a prediction or generate money daily while having less concern about losses. Large Bookmakers, casual bettors, experts, sports enthusiasts who enjoy the ripple of gambling fun together in various markets during this modern era. And in special dates, during important tournament finals or elections days, the stakes get more abundant and more exciting, more active; enthusiastic bettors intensely seeking who to stake against regarding odds and calculative stakes knowing there would generally be only two winners against various options to choose from; you play your cards right (after calculating possibilities, predicting situations or consulting adepts experts after doing own thorough research, again depending on particular markets' liquidity to allow for various bets - some specialized websites cover politics better than conventional bookmakers as they deeply understand their side interest in such). The potential prizes could pay all your bills in a blink of an eye.

However, the search for easy money has significant consequences in this seemingly illegal activity in Brazil. No formal legislation regulates it in the country as laws need to be more up to date with technology or can't keep up with it - only that side of progression, while severe gambling or police don't disturb as individuals still endure privation and financial obligation. The authorities only monitor gamblers, intimidate con artists, small or scared punters to encourage outcomes in their favor. Big-time gamblers seek different platforms, which opens doors to entrances for newcomers to join and play.

Currently, several Presidential election betting markets are thriving and liquid, along with European football markets involving giants like Barcelona, Real Madrid, and more top-rated teams, with trust from users who recognize that reputable houses run these sites and they can stake their funds safely on a possibly guaranteed win. There's research involved before putting hard-earned money at risk. Of course, no crystal ball assurance, prediction carries some unpredictability despite calculated analysis since some unique precursor or development can negatively influence the possible outcome. So the punter or consumer should tread carefully or avoid large-scale bets for more enormous and risky profits. Only faint-hearted better deemed capable of calculating risk are advised to venture in.

At least five betting houses, including established companies such as Bet365 and Betfair, have bets available on the US election. On the eve of election day 2024, Democrat Luiz Inácio Lula da Silva and Republican Jair Bolsonaro maintained a technical draw in the presidential race. Some

sites boosted Lula's bonuses by up to 2.8 percent over Bolsonaro in the last week. Former President Luiz Inácio Lula da Silva of the Workers' Party (PT) is vying against the sitting President Jair Messias Bolsonaro of the Liberal Party (PL) for a seat on the country's highest platform. According to current election laws, a candidate must secure more than 50% of the vote to win in the first round of voting, which is scheduled for next month; otherwise, a second-round runoff election takes place in four weeks. Unless Lula wins by a majority (more than half) of the valid votes, in accordance with the electoral law, the top two candidates then run in a runoff on November 20. Still, Bolsonaro trails Lula by 12 points amongst likely voters, a new Datafolha survey found, as the far-right incumbent struggles to recover. But his image has been tarnished by a corruption case of unparalleled magnitude in Petrobras. Corruption contributed to swaying opinion, even though the country's GDP soared under his Presidency. It shows Brazil currently as one of many countries liberalizing to the democratic ideal and struggling to join politics and sports together.

### Ex-Médico rwandeño acusado de genocidio es arrestado en

# **EE.UU.**

## **Fallo y antecedentes del caso**

El exmédico rwandéño, identificado como Philippe Nshimiye, fue acusado de haber mentido repetidamente sobre su participación en el genocidio en el pasado para obtener estatus de refugiado en los Estados Unidos en 1995, y luego la ciudadanía estadounidense 8 años después. Nshimiye fue condenado por encubrir su participación en al menos siete asesinatos y cinco violaciones durante el genocidio, en el que murieron al menos 800.000 personas en el país africano.

"Durante casi 30 años, el Sr. Nshimiye supuestamente ocultó la verdad sobre los crímenes que cometió durante el genocidio de Ruanda para buscar refugio en los Estados Unidos, y obtener los beneficios de la ciudadanía estadounidense", dijo el fiscal federal interino Joshua Levy de Massachusetts en un comunicado.

## **Desarrollo y detalles de la situación actual**

Nshimiye está detenido en Ohio después de una comparecencia inicial la semana pasada y está previsto que se celebre una audiencia de detención este domingo. También debe comparecer en una corte federal en Boston en una fecha posterior.

Un defensor público en Ohio dijo que no podía realizar comentarios, ya que ya no estaba manejando el caso y que su comprensión era que aún no se había asignado un defensor público en Boston.

Nshimiye fue estudiante de medicina en la Universidad de Ruanda en el campus de Butare a principios de la década de 1990. Las autoridades lo acusan de asesinar a hombres, mujeres y niños tutsi. Sus víctimas incluían un niño de 14 años y un hombre que coseñaba chaquetas de médicos en el hospital universitario, según las autoridades.

## **Testigos, evidencia y fugas**

Los testigos en Ruanda han identificado los lugares de los asesinatos y han dibujado bocetos de las armas de Nshimiye, según las autoridades. Nshimiye también participó en la violación de numerosas mujeres tutsi durante el genocidio, según las autoridades.

Nshimiye huyó de los rebeldes tutsis y llegó a Kenia, donde, en 1995, mintió a los funcionarios estadounidenses de inmigración para obtener el estatus de refugiado en los Estados Unidos, según las autoridades. Nshimiye ha vivido y trabajado en Ohio desde 1995, según funcionarios.
